THALION
CRÉATEUR DE COSMÉTIQUE MARINE

THE HEALING POWERS OF THE OCEAN: THE ESSENCE OF OUR WELLNESS TREATMENTS

Mineral Revitalising Rituals

by THALION

All cures consist of treatments based on seawater and algae: wraps, massages, jet and underwater showers, hydromassage baths, etc. They benefit from excellent bio assimilation and offer targeted responses to specific needs.

Seawater consists of minerals and trace elements (calcium, potassium, magnesium, etc.) with relaxing, revitalising, detoxifying, and remineralising effects. It also contains phytoplankton, which delivers antiviral and antibacterial substances at a specific temperature.

Marine Calcium is excellent for anti-ageing prevention, joint care and skin softness and suppleness.

Marine Potassium helps regulate fluid balance, muscle contractions and nerve signals. It also provides better circulation support.

Marine Magnesium reduces stress and fatigue. It also increases well-being and muscle relaxation.

THE BENEFITS OF MARINE ALGAE

Swaying plumes of seaweed dance and swirl under the sea in thousand hues, concentrating vital active ingredients essential to our body's proper functioning.

Palmaria – the delicate skin protector – is rich in iron, calcium, magnesium, protein, vitamins A and B, beta-carotene, polysaccharides and carrageenans.

Fucus – the ageless caress – is rich in iodine, vitamins, potassium, and other mineral salts. It drains water and toxins and stimulates the immune system.

Himanthalia – the balancing sea spaghetti – is rich in vitamin C, calcium, magnesium, potassium, and omega-3.

Porphyra – the nurturing suppleness – is rich in calcium, protein, iodine, vitamins A and B, and unsaturated fatty acids.

Laminaria – the deep-sea powerful giant – is rich in vitamins A, B1, B12, C, E, F, K, PP, and protein. Purifying, remineralising, and alkalising, laminarias are excellent allies against stress, fatigue, cellulite, and muscle soreness.

Ascophyllum – the toning seaweed – is rich in nutrients, protein, calcium, magnesium, potassium, and trace elements (zinc, iron, selenium). It ensures better lipid metabolism and is known for its slimming properties.

THALION® treatments take you on a discovery of health benefits from the sea in a universe of unforgettable sensations, combining exclusive techniques with ultra-concentrated formulas of our seawater mineral cosmetics for a complete reconnection to the source of beauty.
